

BOJAN ELEZ

FRONTEND DEVELOPER

Profile

Hi, I'm a Frontend Engineer with 5 years of experience in HTML, CSS, React, Node.js and little bit Backend experience. I enjoy using creativity and technology to make user-friendly websites. I'm good at solving tough problems and creating scalable apps. I'm always eager to learn and keep up with industry trends. I work well in teams and believe in clear communication.

I love building websites and web- apps, from my point of view I am trying write clean and maintainable code and web-apps with good UX.

I am looking for a company willing to offer me a placement among their developers. In return, I would offer my full commitment, and be a pleasant and friendly addition to your team. I am currently looking for a new job as a front-end developer. Every day I learn new things and try to improve myself as a Developer. I'm excited to contribute my skills and passion to your development team.

Projects

2023

INSPECTION APP

Client: Dewoonpas

This project was also built from scratch, utilizing cutting-edge technologies. The main objective was to enable the app to work offline, optimizing workflow efficiency in the construction industry. Specifically, the project involved creating an inspection app for houses, designed for inspectors to enter values ranging from dimensions of doors and windows to types of solar panels, all while ensuring seamless offline functionality.

Tech Stack: HTML, CSS, Material UI, Redux Toolkit, React, PWA, NodeJS

2023

FILTER RECOMMENDATION

Client: I2m

I worked independently on this project from scratch, setting up the environment, implementing designs from Figma, and collaborating with multiple API endpoints. The resulting app serves as a standalone widget that supports ecological initiatives. Specifically, I worked on an air filter app, where I also focused on performance optimization, despite a short deadline, and successfully delivered the project.

Tech Stack: HTML, CSS, Styled Components, NextJS, NodeJS, SQL

2022

AURA BLOCKCHAIN CONSORTIUM

Client: Aura

On this project, I primarily worked on the back-end, using NodeJS, SQL, and OpenSearch. The project focused on implementing blockchain technology to enhance data security and transparency, specifically in monitoring the process from the origin of the material to the end customer. My role included designing and implementing robust backend systems to support this extensive monitoring process.

Tech Stack

HTML, CSS, Material UI, React, NodeJS, SQL

2022

AEG USER DASHBOARD

Client: AEG

During my time at AEG, I contributed to a journalism project that served as a blog for sports events. My role involved developing engaging and interactive user interfaces, with a specific focus on enhancing the user experience and visual appeal of the platform. I worked to create an engaging platform for sports enthusiasts to stay updated on their favorite events and stories.

Tech Stack: HTML, CSS, Material UI, React, NodeJS

2021

STS WEBSITE

STS

Domain: Travel & Education Working on the STS Education project, I was responsible for front-end development tasks in React. I maintained user interfaces, ensuring a user-friendly experience for students and travelers. I work with API's and EPI Server CMS.

Tech Stack: HTML, SCSS, React, EpiServer

2020-2022

TENA UK

Client: Essity

Domain: Healthcare

As a Frontend Developer on the TenaUK project, I contributed to the development of a healthcare solution. My role included implementing user interfaces and collaborating with the back-end team to ensure seamless data integration and functionality. The app was CMS

Tech Stack: HTML, SCSS, JQuery, SEO
